

Blackbird family

Inspired by the beautiful blackbird, which in real life is all black except for a yellow eye-ring, we have created the BLACKBIRD family where the round shape is a strong signature feature. Possible to emphasize it even more with the Halo version, giving a possibility to add unique design characteristic visible from afar. BLACKBIRD Mini and Micro family continues the story, symbolizing those small birds sitting on tree branches, singing melodious songs in different directions but in the end leaving everyone with calmness inside. BLACKBIRD Mini and Micro luminaires, reduced in size, with the possibility of different mounting and added accessory options which result in a various atmospheres ensure that these luminaires are capable of fitting in divergent areas.

Blackbird Mini & Micro Spots
