

Capsule collection - this is what happens when an industrial outdoor lighting brand is having fun. It all started with No Rules, no limitations, and no demands or requirements from the customers. The atmosphere of freedom and creativity resulted in 4 products.

NO RULES was developed together with architects "NRJA". Authentic, provocative, and with a good sense of humor. NRJA team designed the showroom of VIZULO thus contributing to our DNA.

BRUT we created in collaboration with designer and architect Martins Pilens. His focus on details and perfection was phenomenal. Bauhaus merged all the arts into modernism, and this influence can easily be seen in Martins' work.

Work with architects encouraged us to continue and thus BOND and BYRON were born - named after two iconic beaches in Australia - Bondi Beach in Sydney and Byron Bay. When I think of freedom, I recall these two places - ocean, wind, waves, surfers, and sun. Here we are – dancing like nobody's watching.

Linda Zeltinga

VIZULO Commercial Director

vizulo NO RULES

An equilateral cross is used in cartography materials and graphic computer programs to form a grid, navigate an image and adhere to a given "frame". To operate outside of the "frame", one must dare to express an opinion that is not in line with the generally accepted. "No rules" is a symbol of this next step – the X shape is used to cross out any previous solutions and to find one's own path.

The two lines that form the X bisect and cross each other in a 90° angle. Depending on the direction the light object is turned and fixed on the ceiling, its meaning is changed from orthogonal clarity to a denial of conventional practices.

NRJA

The architecture office NRJA (No Rules Just Architecture) was founded in Riga in 2008. NRJA is comprised of seven professionals with different mindsets, who seek truthfulness through daily discussions. A strong conception, clarity and provocation are the foundations of NRJA's architecture.

vizULO **BRUT**

BRUT - The most versatile task lamp for agile environments.

Inspired by Bauhaus principles, with an emphasis on geometry and the unity of art and technology, it is a sculptural piece with high design value in the dynamic office landscape.

BRUT illuminates with both direct and indirect light, offering optimal brightness for a variety of tasks and environments. Whether it's enhancing the precision of an office, adding warmth to a home, or creating ambiance in a bustling hotel lobby, this lamp seamlessly adjusts to its surroundings, ensuring perfect lighting wherever it's placed.

The BRUT family offers a variety of configurations, including free-standing, double and single arm lamps, as well as table, wall, and ceiling options. This ensures a unified design aesthetic across spaces, enhancing both ambiance and functionality.

MARTINS PILENS is a Vienna-based architect, product designer graduating from the Bauhaus University of Weimar in 2007. Specializing in office interiors and wine-related product design, Pilens has cultivated a distinctly pure and functional design language, with a focus on creating seamless total looks.

vizulo BONDI

Bondi Beach is a place where nature's greatness meets with people, creating a vibrant and dazzling environment.

Beautiful round shape of the beach has greatly inspired the design of our luminaire, BONDI. With its circular shape and gently curved sides, BONDI captures the flowing motion of waves, reflecting their essence in a seamless arc. Like the ocean itself, BONDI's design embodies movement and vitality, bringing a dynamic energy to any space.

BOND I rod mimics water drops falling on the luminaire's surface, creating precise curved lines.

Byron Bay is a place that is filled with a taste of freedom. Crowded with surfers who are seeking adventure and catching ocean waves.

Our BYRON luminaire is just as bold and strong. It stands out with its linear body and round edges, creating a unique design that was inspired by the curved shape of a surfboard that breaks the water with confidence.
